

### **Shrub Replacement:**

In an effort to streamline the process for the replacement of shrubs, requests for new shrubs are to go directly to the Landscape Committee at:

[Landscapewatercrest.com](http://Landscapewatercrest.com)

At that point, the committee will set a time to come to your house to discuss the shrubs as well as confirm your availability to water the new shrubs daily for a month once they are planted. Sprinklers alone do not supply enough water for new shrubs to survive. Your shrub order will be added to others so that the purchase and installation of the shrubs happens in the most efficient and cost-effective manner.

### **Sod Treatment or Replacement:**

To submit a request for treatment or replacement of sod, please go to [Artistree.com](http://Artistree.com), click on ticket, and follow the prompts. Artistree will come to your residence to evaluate what is needed. If your sod needs to be treated, they will move forward with that. If the sod needs replacing, they will forward the information to the Landscape Committee who will add it to the list of residences needing new sod. The replacement of sod is scheduled once the list reaches a point that will be the most efficient and cost-effective manner.
